

## Modernize Your Business. Collaboration. Productivity.

BCM One, a Gold Microsoft Partner, invites you to participate in a Microsoft Customer Immersion Experience (CIE) hosted by a BCM One certified instructor. This is not a typical presentation format event. Experience an interactive, hands-on approach to test-drive the capabilities of Microsoft Office 365 -- Skype for Business, Azure, SharePoint, Yammer, OneNote, OneDrive and more.

Microsoft Office 365 boosts productivity for businesses with cloud-based collaboration tools that allow your workforce to be productive anytime, anywhere and on virtually any device. Low-upfront costs and the flexibility to add users and services as needed makes Microsoft Office 365 the ideal solution to incorporate across an organization. This half-day lab-environment session is ideal for business decision makers within your organization. You won't be disappointed. This is a fun interactive event to modernize your business.

Create collaboration and productivity across your business! Everyone has a laptop with the full MS Office cloud suite at their fingertips. Small group session - no more than 11 attendees per session.

*"There is so much more to Office 365 than people realize, myself included. Thanks to the team at BCM One for inviting me to the Microsoft Immersion Experience at the Microsoft Center in Time Square!"* Brian Fisher, Principal Consultant -- Fisher Edwards

**Contact BCM One today to sign up for a Microsoft CIE and test drive the powerful collaborative capabilities of Microsoft Office 365.**
